

Introduction:

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) Study for Midway Road/County Road (CR) 712 from Glades Cut Off Road to Selvitz Road in St. Lucie County (see map below). The purpose of the study is to evaluate the need to provide additional capacity to meet existing and future needs; to allow opportunities for pedestrians, bicyclists, and transit facilities; to improve freight movement; and to enhance emergency evacuation.

Alternative 1 – Canal Avoidance

Alternative 2 – Box Culvert

How Can You Get Involved?

There is no need to wait until a public meeting to provide your input. Public comments and questions are welcomed at any time throughout the study. Please see our contact information in the column to the right. We are available for small group meetings with your neighborhood or special interest group.

Alternatives Public Workshop:

An Alternatives Public Workshop has been scheduled to present the alternatives that have been developed to meet the project need; provide an opportunity to discuss the social, environmental, and economic effects of the various alternatives; and obtain input from local officials, agencies and stakeholders.

The workshop will be held in an informal, open-house format. A looping presentation will be available throughout the meeting. FDOT staff and consultant staff members will be available at the workshop to discuss the project and answer questions.

Date: Tuesday, June 28, 2016
Time: 5 p.m. to 7:30 p.m.
Location: Havert L. Fenn Center
Address: 2000 Virginia Avenue, Fort Pierce, Florida 34982

Why Do We Need this Study?

The Port St. Lucie/Fort Pierce area has been identified by the US Census as one of the fastest growing metropolitan areas in Florida. This rapid population growth has resulted in a significant increase in surface transportation. Based on recent traffic data from St. Lucie County, Midway Road/County Road 712 between Glades Cut Off and Selvitz Road does not adequately handle the existing traffic demand. In addition, the County anticipates continued growth and significant new development within and around the project limits. Without capacity improvements, the traffic operations along this corridor will continue to deteriorate.

Contact Information:

For more information about the project or to schedule a group meeting, please contact one of us:

July Jimenez, P.E.
Project Manager, FDOT- District Four
3400 W. Commercial Boulevard
Fort Lauderdale, Florida 33309
Phone: (954) 777-4415
